

# MOTEK IS THE GLOBAL LEADER IN VIRTUAL REALITY ROBOTICS FOR HUMAN MOVEMENT RESEARCH AND REHABILITATION.

—  
Founded in  
**1999**  
in The Netherlands

**85+** employees  
with hubs globally

With over 20 years pioneering the advancement of rehabilitation technology, Motek products and technologies can be found in the most **forward-thinking research facilities, top hospitals and stand-out clinics**, changing lives for the better daily.

From universities to the military, augmented reality to games-for-good development, Motek innovations are used for cutting-edge movement treatment and research **across the globe.**

Motek HQ is located in the Dutch capital of **Amsterdam** where they develop, manufacture and produce their state-of-the-art hard- and software technologies, with brand hubs further located globally. Motek, along with other market leaders such as Hocoma and Fysioroadmap, are part of the DIH family of companies **advancing medical technologies** around the world.

## Technical Project Lead

—  
Motek is looking for a new development project manager to join one of the most respected and pioneering teams in the industry.

### Location

Amsterdam & Culemborg,  
The Netherlands

### WOULD YOU LIKE TO...

- Manage cutting edge hardware and software developments for the clinical and research rehabilitation market
- Lead the successful implementation, planning and roll-out of new products
- Lead (international) projects with cross-functional teams of business, service, development and operation specialists
- Achieve project goals within constraints of budget, time, quality and strategic boundary conditions
- Manage the involved risks and taking corrective actions if the project runs out of your plan
- Be part of a professional team that shares the goal of designing motivating patient therapy and improving therapy outcomes

### WE MATCH WITH PEOPLE WHO...

- Are open to new ideas and feel comfortable in a dynamic environment

- Have great analytic skills and think solution-oriented
- Can work independently and are able to familiarize themselves with new topics
- Have good social skills, and integrate well into a multi-disciplinary and multicultural team
- Perform their tasks with passion, precision and curiosity
- Combine a critical eye with a can-do attitude

### YOU HAVE...

- A Master or Bachelor degree in a technical or life science field
- Preferably around 2-3 years of experience in leading (international) multi-disciplinary product development projects
- Preferably certified in Project Management and Agile methodologies
- Excellent stakeholder management skills – bridging conflicting interests with strong negotiation and interpersonal skills
- Strong analytical skills and the ability to manage highly interrelated requirements

Above all else – the **right attitude** and **drive** is what we are looking for.
